(1) Original exposure, unlike Exposure value, is reported before taking into account any effect due to credit conversion factors or credit risk mitigation techniques (e.g. substitution effects).
 (2) IRB Total does not include the Securitisation position unlike in the results prior to the 2019 exercise.
 (3) Only the most relevant countries are disclosed. These have been selected under the following rule: Countries of counterparty covering up to 95% of total original exposure or Top 10 countries ranked by original exposure, calculated end-of-fiscal quarter.

Notes and definitions

Information disclosed in this template is sourced from COREP template C 33, introduced with the reporting framework 2.7, applicable for reports as of 31 March 2018.

(1) Information on sovereign exposures is only available for institutions that have sovereign exposures of at least 1% of total "Debt securities and loans receivables". Country of breakdown is only available for institutions that hold non-domestic sovereign exposures of 10% or more compared to total sovereign exposures. Where the latter threshold is not met, information is disclosed through the aggregate "Others".

(2) The exposures reported cover only exposures to central, regional and local governments on immediate borrower basis, and do not include exposures to other counterparties with full or partial government guarantees

(3) The banks disclose the exposures in the "Financial assets held for trading" portfolio after offsetting the cash short positions having the same maturities.

(4) The exposures reported include the positions towards counterparties (other than sovereign) on sovereign credit risk (i.e. CDS, financial guarantees) booked in all the accounting portfolio (on-off balance sheet). Irrespective of the denomination and/or accounting classification of the positions

the economic substance over the form must be used as a criteria for the identification of the exposures to be included in this column. This item does not include exposures to counterparties (other than sovereign) with full or partial government guarantees by central, regional and local governments

(5) Residual countries not reported separately in the Transparency exercise

Regions:

Other advanced non EEA: Israel, Korea, New Zealand, Russia, San Marino, Singapore and Taiwan.

Other CEE non EEA: Albania, Bosnia and Herzegovina, FYR Macedonia, Montenegro, Serbia and Turkey.

(6) The columns "Total carrying amount of non-derivative financial assets (net of short positions)" provide information on a net basis, whilst the related "of which" positions present information on a gross basis.

(7) The values for the "Other" bucket is calculated subtracting from the reported Total the breakdown of the listed countries. As a result of precision and rounding in the calculation we accept an approximation in the order of e04.

(8) Information on Non-derivative financial assets by accounting portfolio is not included for institutions applying nGAAP

⁽¹⁾ For the definition of non-performing exposures please refer to Article 47(2) of Regulation (EU) No 575/2013 (CRD).

⁽²⁾ Institutions report here the cumulative amount of assessed credit losses since initial recognition for financial instruments subject to impairment and provisions for off-balance sheet exposures.

⁽³⁾ Institutions report here the cumulative amount of assessed credit losses since initial recognition for financial instruments subject to impairment and provisions for off-balance sheet exposures.

⁽⁴⁾ For the on-balance sheet items, accumulated impairments and accumulated negative changes in fair value due to credit risk are disclosed with a positive sign if they are decreasing assets. Following this sign convention, information is disclosed with the opposite sign of what is reported according to the PFRB framework (paragraph F 10.00 / F 10.01), which follows a sign convention based on a credit/debit convention, as explained in Annex V, Part 1 paragraphs 10 and 11 of Regulation (EU) 2014/51 - ITS on Supervisory reporting. However, for the off-balance sheet instruments, the same item (Accumulated impairment, accumulated changes in fair value due to credit risk and provisions) is disclosed consistently with the PFRB sign convention. This is because, based on the sign convention, the provisions on off-balance sheet commitments are generally reported with a positive sign.

⁽⁵⁾ From June 2021, the gross carrying amount of assets and accumulated impairments that are purchased or originated as credit engaged at initial recognition are not included in the impairment stages, as it was the case in previous periods.

¹⁾ Forborne exposures are debt contracts in respect of which forbearance measures as defined in Article 47b(1) and (2) CRR have been applied

²⁾ For the on-balance sheet items, accumulated impairments and accumulated negative changes in fair value due to credit risk are disclosed with a positive sign if they are decreasing assets. Following this sign convention, information is disclosed with the opposite sign of what is reported according to the FINREP framework (templates F 18.00 / F 19.00), which follows a sign convention based on a credit/debit convention, as explained in Annex V, Part 1 paragraphs 10 and 11 of Regulation (EU) 2021/451- ITS on Supervisory reporting. However, for the off-balance sheet instruments, the same item ('Accumulated impairment, accumulated changes in fair value due to credit risk and provisions') is disclosed consistently with the FINREP sign convention. This is because, based on this sign convention, the provisions on off-balance sheet commitments are generally reported with a positive sign.

³⁾ The information applies only to banks meeting at least one of the criteria for significance and having a ratio of non-performing loans and advances divided by total loans and advances (excluding loans and advances classified as held for sale, cash balances at central banks and other demand deposits) of 5% or above.
