Notes and definitions

Information disclosed in this template is sourced from COREP template C 33, introduced with the reporting framework 2.7, applicable for reports as of 31 march 2018.

(1) Information on sovereign exposures is only available for institutions that have sovereign exposures of at least 1% of total "Debt securities and loans receivables". Country of breakdown is only available for institutions that hold non-domestic sovereign exposures of 10% or more compared to total sovereign exposures. Where the latter threshold is not met, information is disclosed through the aggregate "Others".

(2) The exposures reported cover only exposures to central, regional and local governments on immediate borrower basis, and do not include exposures to other counterparties with full or partial government guarantees

(3) The banks disclose the exposures in the "Financial assets held for trading" portfolio after offsetting the cash short positions having the same maturities.

(4) The exposures reported include the positions towards counterparties (other than sovereign) on sovereign credit risk (i.e. CDS, financial guarantees) booked in all the accounting portfolio (on-off balance sheet). Irrespective of the denomination and or accounting classification of the positions the economic substance over the form must be used as a criteria for the identification of the exposures to be included in this column. This item does not include exposures to counterparties (other than sovereign) with full or partial government guarantees by central, regional and local governments

⁽¹⁾ For the definition of non-conforming exposures please refer to Article 47(a)(2) of Regulation (EU) No 575/2013 (CRD).

⁽²⁾ Institutions report here the cumulative amount of assessed credit losses since initial recognition for financial instruments subject to impairment and provisions for off-balance sheet exposures.

⁽³⁾ Institutions report here the cumulative amount of assessed credit losses since initial recognition for financial instruments subject to impairment, the accumulated negative changes in fair value due to credit risk for financial instruments measured at fair value through profit or loss other than MPT and provisions for off-balance sheet exposures.

⁽⁴⁾ For the on-balance sheet items, accumulated impairments and accumulated negative changes in fair value due to credit risk are disclosed with a positive sign if they are decreasing assets. Following this sign convention, information is disclosed with the opposite sign of what is reported according to the FROB framework (Articles F 10.00 / F 10.01), which follows a sign convention based on a credit/debit convention, as explained in Annex V, Part 1 paragraphs 10 and 11 of Regulation (EU) 2021/451 - ITS on Supervisory reporting. However, for the off-balance sheet instruments, the same item 'Accumulated impairment, accumulated changes in fair value due to credit risk and provisions' is disclosed consistently with the FROB sign convention. This is because, based on the sign convention, the provisions on off-balance sheet commitments are generally reported with a positive sign.

⁽⁵⁾ From June 2021, the gross carrying amount of assets and accumulated impairments that are purchased or originated as credit engaged at initial recognition are not included in the impairment stages, as it was the case in previous periods.
