Market risk template does not include CIU positions under the particular approach for position risk in CIUs (Articles 348(1), 350 (3) (c) and 364 (2) a) CRR). For internal model banks, it also does not include certain add-ons imposed by the supervisor as part of the ongoing review of internal models (Article 110 CRR), both the own fund requirements for these CIU positions and those resulting from the add-on for internal model banks re in the RWEA OV2 template.

(1) Original exposure, unless Exposure value, is reported before taking into account any effect due to credit conversion factors or credit risk mitigation techniques (e.g. substitution effects).
 (2) Standardised Total does not include the securitisation position unless in the results prior to the 2025 exercise.
 (3) Only the most relevant countries are disclosed. These have been selected under the following rule: Countries of counterparty covering up to 10% of total original exposure or Top 10 countries ranked by original exposure, whichever is of the greater.
 (4) Starting from the 2024 exercise, value adjustments and provisions for the consolidated data include general credit risk adjustments, for the consistency with the data per country of counterparty.

Notes and definitions

Information disclosed in this template is sourced from COREP template C 33, introduced with the reporting framework 2.7, applicable for reports as of 31 March 2018.

(1) Information on sovereign exposures is only available for institutions that have sovereign exposures of at least 1% of total "Debt securities and loans receivables". Country of breakdown is only available for institutions that hold non-domestic sovereign exposures of 10% or more compared to total sovereign exposures. Where the latter threshold is not met, information is disclosed through the aggregate "Others".

(2) The exposures reported cover only exposures to central, regional and local governments on immediate borrower basis, and do not include exposures to other counterparties with full or partial government guarantees.

(3) The banks disclose the exposures in the "Financial assets held for trading" portfolio after offsetting the cash short positions having the same maturities.

(4) The exposures reported include the positions towards counterparties (other than sovereign) on sovereign credit risk (i.e. CDS, financial guarantees) booked in all the accounting portfolio (on-off balance sheet). Irrespective of the denomination and/or accounting classification of the positions the economic substance over the form must be used as a criteria for the identification of the exposures to be included in this column. This item does not include exposures to counterparties (other than sovereign) with full or partial government guarantees by central, regional and local governments

(5) Residual countries not reported separately in the Transparency exercise.

Regions:

Other advanced non-EEA: Israel, Korea, New Zealand, Russia, San Marino, Singapore and Taiwan.

(6) The columns "Total carrying amount of non-derivative financial assets (net of short positions)" provide information on a net basis, whilst the related 'of which' positions present information on a gross basis.

(7) The values for the "Other" bucket is calculated subtracting from the reported Total the breakdown of the listed countries. As a result of precision and rounding in the calculation we accept an approximation in the order of €04.

(8) Information on Non-derivative financial assets by accounting portfolio is not included for institutions applying nGAAP.

⁽²⁾ For the on-balance sheet items, accumulated impairments and accumulated negative changes in fair value due to credit risk are disclosed with a positive sign if they are decreasing assets. Following this sign convention, information is disclosed with the opposite sign of what is reported according to the FINREP framework (templates F 18.00 / F 19.00), which follows a sign convention based on a credit/debit convention, as explained in Annex V, Part 1 paragraphs 10 and 11 of Regulation (EU) 2021/451- ITS on Supervisory reporting. However, for the off-balance sheet instruments, the same item ('Accumulated impairment, accumulated changes in fair value due to credit risk and provisions') is disclosed consistently with the FINREP sign convention. This is because, based on this sign convention, the provisions on off-balance sheet commitments are generally reported with a positive sign.

⁽³⁾ The information applies only to banks meeting at least one of the criteria for significance and having a ratio of non-performing loans and advances divided by total loans and advances (excluding loans and advances classified as held for sale, cash balances at central banks and other demand deposits) of 5% or above.

⁽¹⁾ The items 'accumulated impairment' and 'accumulated negative changes in fair value due to credit risk on non-performing exposures' are disclosed with a positive sign if they are decreasing an asset. Following this sign convention, information is disclosed with the opposite sign of what is reported according to the FINREP framework (template F 06.01), which follows a sign convention based on a credit/débit convention, as explained in Annex V, Part 1 paragraphs 10 and 11 of Regulation (EU) 2021/451 - ITS on Supervisory reporting.

The 'NACE codes' disclosed in this template F 06.01 are the codes included in Regulation (EC) No 1893/2006 of the European Parliament and of the Council (NACE rev. 2). The latter has been reviewed by the Commission Delegated Regulation (EU) 2023/137 of 10 October 2022 (NACE rev. 2.1) which shall apply to the data transmissions to the Commission (Eurostat) relating to each reference period from 1 January 2025. Until the Commission Implementing Regulation (EU) 2021/451 is amended to include the new codes (NACE rev. 2.1), institutions are asked to keep reporting the outdated codes (NACE rev. 2).
