

## Results of the 2011 EBA EU-wide stress test: Summary <sup>(1-3)</sup>

Name of the bank: Lloyds Banking Group plc

Actual results at 31 December 2010	million EUR, %
Operating profit before impairments	13.022
Impairment losses on financial and non-financial assets in the banking book	-15.313
Risk weighted assets <sup>(4)</sup>	472.114
Core Tier 1 capital <sup>(4)</sup>	47.984
Core Tier 1 capital ratio, % <sup>(4)</sup>	10,2%
<b>Additional capital needed to reach a 5 % Core Tier 1 capital benchmark</b>	

Outcomes of the adverse scenario at 31 December 2012, excluding all mitigating actions taken in 2011	%
Core Tier 1 Capital ratio	7,7%

Outcomes of the adverse scenario at 31 December 2012, including recognised mitigating measures as of 30 April 2011	million EUR, %
2 yr cumulative operating profit before impairments	19.097
2 yr cumulative impairment losses on financial and non-financial assets in the banking book	-31.544
2 yr cumulative losses from the stress in the trading book of which valuation losses due to sovereign shock	-388 -60
Risk weighted assets	526.563
Core Tier 1 Capital	40.625
<b>Core Tier 1 Capital ratio (%)</b>	<b>7,7%</b>
<b>Additional capital needed to reach a 5 % Core Tier 1 capital benchmark</b>	

Effects from the recognised mitigating measures put in place until 30 April 2011 <sup>(5)</sup>	
Equity raisings announced and fully committed between 31 December 2010 and 30 April 2011 (CT1 million EUR)	0
Effect of government support publicly announced and fully committed in period from 31 December 2010 to 30 April 2011 on Core Tier 1 capital ratio (percentage points of CT1 ratio)	0,0
Effect of mandatory restructuring plans, publicly announced and fully committed in period from 31 December 2010 to 30 April 2011 on Core Tier 1 capital ratio (percentage points of CT1 ratio)	0,0

Additional taken or planned mitigating measures	percentage points contributing to capital ratio
Use of provisions and/or other reserves (including release of countercyclical provisions)	0,0
Divestments and other management actions taken by 30 April 2011	0,0
Other disinvestments and restructuring measures, including also future mandatory restructuring not yet approved with the EU Commission under the EU State Aid rules	0,0
Future planned issuances of common equity instruments (private issuances)	0,0
Future planned government subscriptions of capital instruments (including hybrids)	0,0
Other (existing and future) instruments recognised as appropriate back-stop measures by national supervisory authorities	0,0
Supervisory recognised capital ratio after all current and future mitigating actions as of 31 December 2012, % <sup>(6)</sup>	7,7%

### Notes

- (1) The stress test was carried using the EBA common methodology, which includes a static balance sheet assumption and incorporates regulatory transitional floors, where binding (see <http://www.eba.europa.eu/EU-wide-stress-testing/2011.aspx> for the details on the EBA methodology).
- (2) All capital elements and ratios are presented in accordance with the EBA definition of Core Tier 1 capital set up for the purposes of the EU-wide stress test, and therefore may differ from the definitions used by national supervisory authorities and/or reported by institutions in public disclosures.
- (3) Neither baseline scenario nor the adverse scenario and results of the stress test should in any way be construed as a bank's forecast or directly compared to bank's other published information.
- (4) Full static balance sheet assumption excluding any mitigating management actions, mandatory restructuring or capital raisings post 31 December 2010 (all government support measures and capital raisings fully paid in before 31 December 2010 are included).
- (5) Effects of capital raisings, government support and mandatory restructuring plans publicly announced and fully committed in period from 31 December 2010 to 30 April 2011, which are incorporated in the Core Tier 1 capital ratio reported as the outcome of the stress test.
- (6) The supervisory recognised capital ratio computed on the basis of additional mitigating measures presented in this section. The ratio is based primarily on the EBA definition, but may include other mitigating measures not recognised by the EBA methodology as having impacts in the Core Tier 1 capital, but which are considered by the national supervisory authorities as appropriate mitigating measures for the stressed conditions. Where applicable, such measures are explained in the additional announcements issued by banks/national supervisory authorities. Details of all mitigating measures are presented in the worksheet "3 - Mitigating measures).

## Results of the 2011 EBA EU-wide stress test: Aggregate information and evolution of capital <sup>(1-4)</sup>

Name of the bank: Lloyds Banking Group plc

All in million EUR or %

**A. Results of the stress test based on the full static balance sheet assumption without any mitigating actions, mandatory restructuring or capital raisings post 31 December 2010 (all government support measures fully paid in before 31 December 2010 are included)**

Capital adequacy	2010	Baseline scenario		Adverse scenario	
		2011	2012	2011	2012
Risk weighted assets (full static balance sheet assumption)	472.114	483.304	484.176	520.087	548.300
Common equity according to EBA definition	47.984	48.044	53.127	41.193	39.851
of which ordinary shares subscribed by government	23.165	23.165	23.165	23.165	23.165
Other existing subscribed government capital (before 31 December 2010)	0	0	0	0	0
Core Tier 1 capital (full static balance sheet assumption)	47.984	48.044	53.127	41.193	39.851

Risk weighted assets after other mitigating measures (B+C+F)	472.395	462.440	509.178	526.563
Capital after other mitigating measures (A+B1+C1+D+E+F1)	48.004	53.902	41.153	40.625
<b>Supervisory recognised capital ratio (%) <sup>(15)</sup></b>	<b>10,2%</b>	<b>11,7%</b>	<b>8,1%</b>	<b>7,7%</b>

#### Notes and definitions

(1) The stress test was carried using the EBA common methodology, which includes a static balance sheet assumption (see <http://www.eba.europa.eu/EU-wide-stress-testing/2011.aspx> for the details on the EBA methodology).

(2) All capital elements and ratios are presented in accordance with the EBA definition of Core Tier 1 capital set up for the purposes of the EU-wide stress test, and therefore may differ from the definitions used by national supervisory authorities and/or reported by institutions in public disclosures.

(3) Neither baseline scenario nor the adverse scenario and results of the stress test should in any way be construed as a bank's forecast or directly compared to bank's other published information.

(4) Regulatory transitional floors are applied where binding. RWA for credit risk have been calculated in accordance with the EBA methodology assuming an additional floor imposed at a level of RWA, before regulatory transitional floors, for December 2010 for both IRB and STA portfolios.

(5) Banks are required to provide explanations of what "Other operating income" and "Other income" constitutes for.

**Composition of "Other operating income" and "Other income": "Other operating income" is composed of net fees and commissions income and other operating income. "Other Income" is composed of a number of items including the P&L unwind of certain HBoS acquisition related fair value adjustments on both assets and liabilities, the P&L results of JVs and non-consolidated entities, the impact of the mark to market revaluations of the equity conversion feature of the Group's Enhanced Capital Notes ("CoCos") and a number of Statutory P&L items including the costs of integrating the HBoS acquisition and the Payment Protection Insurance Provision.**

(6) If under the national legislation, the release of countercyclical provisions and/or other similar reserves is allowed, this figure for 2010 could be included either in rows "Impairments on financial assets in the banking book" or "Other income" for 2010, whereas under the EU-wide stress test methodology such release for 2011-2012 should be reported in Section D as other mitigating measures.

(7) Net profit includes profit attributable to minority interests.

(8) Deferred tax assets as referred to in paragraph 69 of BCBS publication dated December 2010: "Basel 3 – a global regulatory framework for more resilient banks and banking systems".

(9) Stock of provisions includes collective and specific provisions as well as countercyclical provisions, in the jurisdictions, where required by the national legislation.

(10) Provisions for non-defaulted exposures to sovereigns and financial institutions have been computed taking into account benchmark risk parameters (PDs and LGDs) provided by the EBA and referring to external credit ratings and assuming hypothetical scenario of rating agency downgrades of sovereigns.

(11) For definition of commercial real estate please refer to footnote (5) in the worksheet "4 - EADs".

(12) Coverage ratio = stock of provisions on defaulted assets / stock of defaulted assets expressed in EAD for the specific portfolio.

(13) Loss rate = total impairment flow (specific and collective impairment flow) for a year / total EAD for the specific portfolio (including defaulted and non-defaulted assets but excluding securitisation and counterparty credit risk exposures).

(14) All elements are reported net of tax effects.

(15) The supervisory recognised capital ratio computed on the basis of additional mitigating measures presented in this section. The ratio is based primarily on the EBA definition, but may include other mitigating measures not recognised by the EBA methodology as having impacts in the Core Tier 1 capital, but which are considered by the national supervisory authorities as appropriate mitigating measures for the stressed conditions. Where applicable, such measures are explained in the additional announcements issued by banks/national supervisory authorities. Details of all mitigating measures are presented in the worksheet "3 - Mitigating measures".

## Results of the 2011 EBA EU-wide stress test: Composition of capital as of 31 December 2010

Name of the bank: Lloyds Banking Group plc

Situation at December 2010	December 2010		References to COREP reporting
	Million EUR	% RWA	
<b>A) Common equity before deductions (Original own funds <u>without hybrid instruments and government support measures other than ordinary shares</u>) (+)</b>	<b>48.313</b>	10,2%	COREP CA 1.1 - hybrid instruments and government support measures other than ordinary shares
Of which: (+) eligible capital and reserves	54.463	11,5%	COREP CA 1.1.1 + COREP line 1.1.2.1
Of which: (-) intangibles assets (including goodwill)	-6.069	-1,3%	Net amount included in T1 own funds (COREP line 1.1.5.1)
Of which: (-/+) adjustment to valuation differences in other AFS assets <sup>(1)</sup>	740	0,2%	Prudential filters for regulatory capital (COREP line 1.1.2.6.06)
<b>B) Deductions from common equity (Elements deducted from original own funds) (-)</b>	<b>-329</b>	-0,1%	COREP CA 1.3.T1* (negative amount)
Of which: (-) deductions of participations and subordinated claims	-80	0,0%	Total of items as defined by Article 57 (l), (m), (n) (o) and (p) of Directive 2006/48/EC and deducted from original own funds (COREP lines from 1.3.1 to 1.3.5 included in line 1.3.T1*)
Of which: (-) securitisation exposures not included in RWA	-249	-0,1%	COREP line 1.3.7 included in line 1.3.T1*
Of which: (-) IRB provision shortfall and IRB equity expected loss amounts (before tax)	0	0,0%	As defined by Article 57 (q) of Directive 2006/48/EC (COREP line 1.3.8 included in 1.3.T1*)
<b>C) Common equity (A+B)</b>	<b>47.984</b>	10,2%	
Of which: ordinary shares subscribed by government	23.165	4,9%	Paid up ordinary shares subscribed by government

<b>E) Core Tier 1 including existing government support measures (C+D)</b>	<b>47.984</b>	10,2%	Common equity + Existing government support measures included in T1 other than ordinary shares
<b>Difference from benchmark capital threshold (CT1 5%)</b>	<b>24.378</b>	5,2%	Core tier 1 including government support measures - (RWA*5%)
<b>F) Hybrid instruments not subscribed by government</b>	<b>6.791</b>	1,4%	Net amount included in T1 own funds (COREP line 1.1.4.1a + COREP lines from 1.1.2.2**01 to 1.1.2.2**05 + COREP line 1.1.5.2a (negative amount)) not subscribed by government
<b>Tier 1 Capital (E+F) (Total original own funds for general solvency purposes)</b>	<b>54.774</b>	11,6%	COREP CA 1.4 = COREP CA 1.1 + COREP CA 1.3.T1* (negative amount)
<b>Tier 2 Capital (Total additional own funds for general solvency purposes)</b>	<b>32.277</b>	6,8%	COREP CA 1.5
<b>Tier 3 Capital (Total additional own funds specific to cover market risks)</b>	<b>0</b>	0,0%	COREP CA 1.6
<b>Total Capital (Total own funds for solvency purposes)</b>	<b>71.818</b>	15,2%	COREP CA 1
<b>Memorandum items</b>			
Amount of holdings, participations and subordinated claims in credit, financial and insurance institutions <u>not deducted for the computation of core tier 1</u> but deducted for the computation of total own funds	-15.313	-3,2%	Total of items as defined by Article 57 (l), (m), (n) (o) and (p) of Directive 2006/48/EC not deducted for the computation of original own funds
Amount of securitisation exposures not included in RWA and <u>not deducted for the computation of core tier 1</u> but deducted for the computation of total own funds	-249	-0,1%	Total of items as defined by Article 57 (r) of Directive 2006/48/EC not deducted for the computation of original own funds
Deferred tax assets <sup>(2)</sup>	7.326	1,6%	As referred to in paragraph 69 of BCBS publication dated December 2010 : "Basel 3 – a global regulatory framework for more resilient banks and banking systems"
Minority interests (excluding hybrid instruments) <sup>(2)</sup>	368	0,1%	Gross amount of minority interests as defined by Article 65 1. (a) of Directive 2006/48/EC
Valuation differences eligible as original own funds (-/+) <sup>(3)</sup>	537	0,1%	COREP line 1.1.2.6

### Notes and definitions

(1) The amount is already included in the computation of the eligible capital and reserves and it is provided separately for information purposes.

(2) According to the Basel 3 framework specific rules apply for the treatment of these items under the Basel 3 framework, no full deduction is required for the computation of common equity.

(3) This item represents the impact in original own funds of valuation differences arising from the application of fair value measurement to certain financial instruments (AFS/FVO) and property assets after the application of prudential filters.

## Results of the 2011 EBA EU-wide stress test: Overview of mitigating measures <sup>(1-2)</sup>

Name of the bank: Lloyds Banking Group plc

### Use of countercyclical provisions, divestments and other management actions

Please fill in the table using a separate row for each measure	Narrative description	Date of completion (actual or planned for future issuances)	Capital / P&L impact (in million EUR)	RWA impact (in million EUR)	Capital ratio impact (as of 31 December 2012) %
<b>A) Use of provisions and/or other reserves</b> (including release of countercyclical provisions), <sup>(3)</sup>					
<b>B) Divestments and other management actions taken by 30 April 2011</b>					
1)					
2)					
<b>C) Other disinvestments and restructuring measures, including also future mandatory restructuring not yet approved with the EU Commission under the EU State Aid rules</b>					
1)					
2)					

### Future capital raisings and other back stop measures

Please fill in the table using a separate row for each measure	Date of issuance (actual or planned for future issuances, dd/mm/yy)	Amount (in million EUR)	Maturity (dated/ undated) <sup>(4)</sup>	Loss absorbency in going concern (Yes/No)	Flexibility of payments (capacity to (Yes/No)	Permanence (Undated and without incentive to (Yes/No)	Conversion clause (where appropriate)			
							Nature of conversion (mandatory/ discretionary)	Date of conversion (at any time/from a specific date: dd/mm/yy)	Triggers (description of the triggers)	Conversion in common equity (Yes/No)
<b>D) Future planned issuances of common equity instruments (private issuances)</b>										
<b>E) Future planned government subscriptions of capital instruments (including hybrids)</b>										
1) Denomination of the instrument										
2)										
<b>F) Other (existing and future) instruments recognised as back stop measures by national supervisory authorities (including hybrids)</b>										
1) Denomination of the instrument										
2)										

#### Notes and definitions

(1) The order of the measures follows the order of mitigating measures reported in the Section D of the worksheet "1 - Aggregate information".

(2) All elements are reported net of tax effects.

(3) If under the national legislation, the release of countercyclical provisions and/or other similar reserves is allowed, this figure for 2010 could be included either in rows "Impairments on financial assets in the banking book" or "Other income" for 2010, whereas under the EU-wide stress test methodology such release for 2011-2012 should be reported in Section D of the worksheet "1 - Aggregate information" as other mitigating measures and explained in this worksheet.

(4) If dated please insert the maturity date (dd/mm/yy) otherwise specify undated.

Notes and definitions

(1) EAD - Exposure at Default or exposure value in the meaning of the CRD.

(2) The EAD reported here are based on the methodologies and portfolio breakdowns used in the 2011 EU-wide stress test, and hence may differ from the EAD reported by banks in their Pillar 3 disclosures, which can vary based on national regulation. For example, this would affect breakdown of EAD for real estate exposures and SME exposures.

(3) Breakdown by country and macro area (e.g. Asia) when EAD >=5%. In any case coverage 100% of total EAD should be ensured (if exact mapping of some exposures to geographies is not possible, they should be allocated to the group "others").

(4) The allocation of countries and exposures to macro areas and emerging/non-emerging is according to the IMF WEO country groupings. See: <http://www.imf.org/external/pubs/ft/weo/2010/01/weodata/groups.htm>

(5) Residential real estate property which is or will be occupied or let by the owner, or the beneficial owner in the case of personal investment companies, and commercial real estate property, that is, offices and other commercial premises, which are recognised as eligible collateral in the meaning of the CRD, with the following criteria, which need to be met:

- (a) the value of the property does not materially depend upon the credit quality of the obligor. This requirement does not preclude situations where purely macro economic factors affect both the value of the property and the performance of the borrower; and
- (b) the risk of the borrower does not materially depend upon the performance of the underlying property or project, but rather on the underlying capacity of the borrower to repay the debt from other sources. As such, repayment of the facility does not materially depend on any cash flow generated by the underlying property serving as collateral.

(6) Loan to value ratio - ratio of EAD to the market value of real estate used as collateral for such exposures. Given the different methodologies applied to assessing the value, the bank is required to explain the computation of the ratio. In particular (a) whether collateral values is marked-to-market or any other valuation method is used, (b) whether the amount has been adjusted for principal repayments, and (c) how guarantees other than the underlying property are treated.

Definition of Loan to Value ratio used:

Residential Mortgages

- a) Collateral value is generated by taking the latest valuation undertaken and then using the Halifax HPI index to create an estimated current value.
- b) "EAD" has been set as the value of debt at the balance sheet date. Regulatory EAD was not deemed appropriate as:- it includes mortgages which have been agreed but not yet advanced, on which no collateral has been taken; it ignores capital repayments.
- c) Retail Mortgages are always secured against property with no material exceptions

Commercial Real Estate

- a) Collateral value is generated by taking the latest valuation undertaken and then using the IPD index to create an estimated current value. Appropriate management judgement is then applied to adjust this estimate to reflect the difference between LBG portfolio and the IPD reference portfolio
- b) EAD reflects expected movements from the reporting date to expected default date, including interest and costs but not principle repayments.
- c) Guarantees other than underlying property are excluded from the calculation.

(7) Total exposures is the total EAD according to the CRD definition based on which the bank computes RWA for credit risk. Total exposures, in addition to the exposures broken down by regulatory portfolios in this table, include EAD for securitisation transactions, counterparty credit risk, sovereigns, guaranteed by sovereigns, public sector entities and central banks.

Results of the 2011 EBA EU-wide stress test: Exposures to sovereigns (central and local governments), as of 31 December 2010, mln EUR <sup>(1,2)</sup>

Name of the bank: Lloyds Banking Group plc

All values in million EUR

**Notes and definitions**

(1) The allocation of countries and exposures to macro areas and emerging/non-emerging is according to the IMF WEO country groupings. See: <http://www.imf.org/external/pubs/ft/weo/2010/01/weodata/groups.htm>

(2) The exposures reported in this worksheet cover only exposures to central and local governments on immediate borrower basis, and do not include exposures to other counterparties with full or partial government guarantees (such exposures are however included in the total EAD reported in the worksheet "4 - EADs").

(3) According to the EBA methodologies, for the trading book assets banks have been allowed to offset only cash short positions having the same maturities (paragraph 202 of the Methodological note).
