

Closing remarks

EBA has identified number of challenging areas that may require further clarification based on the supervisory experience, including:

- Application of business model analysis to smaller institutions
- Transparency of SREP outcomes, and in particular TSCR → public disclosures in light of Market abuse and Transparency Directives
- More consistency in ICAAP and ILAAP submissions and supervisory assessments
- Reconciliation between SREP outcomes and macroprudential measures
- Addressing systemic risk in SREP

What other challenges do you see and what topics would flag to the EBA attention?
