Heatmap		3
Risk Indicators (RIs)		
Solvency	Tier 1 capital ratio	4
	Total capital ratio	5
	CET1 ratio	6
	Leverage ratio	7
Credit Risk and Asset Quality	Ratio of non-performing loans and advances (NPL ratio)	8
	Coverage ratio for non-performing loans and advances	9
	Forbearance ratio for loans and advances	10
	Ratio of non-performing exposures (NPE ratio)	11
Profitability	Return on equity	12
	Return on assets	13
	Cost to income ratio	14
	Net interest income to total net operating income	15
	Net fee and commission income to total net operating income	16
	Net trading income to total net operating income	17
	Net interest margin	18
	Cost of Risk	19
Funding and Liquidity	Loan-to-deposit ratio (for households and non-financial corporations)	20
	Asset encumbrance ratio	21
	Liquidity coverage ratio	22
	Net stable funding ratio	23
Annex 1: Statistical Annex	Coverage EU banking sample	24
	Asset composition and volumes	26
	Loans: composition and asset quality	27
	Loans: NPL and coverage ratios	28
	Distribution of NFC loans and advances by NACE code	29
	NPL ratios of NFC loans and advances by NACE code	30
	Exposures to Real Estate activities and Construction	31
	IFRS9 specific data	32
	Sovereign exposures	33
	Liability composition and volumes	34
	Liquidity	35
	Composition of own funds and risk-weighted assets	36
	Profitability analysis: main drivers within RoE	37
Annex 2: Methodological note or	n the RIs heatmap	38
Annex 3: The RI and Annex datab	pase	39

Note: Traffic lights provide the trend of the RI risk indicator given the historical time series. Data bar colour scale: green for the "best bucket", yellow for the intermediate and red for the "worst bucket". Further explanations on the calculation of the heatmap can be found in the "methodological note" in the Annex of this Risk Dashboard.

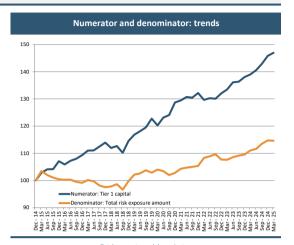

1 - Tier 1 capital ratio*

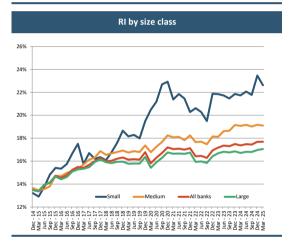

5th and 95th pct, interquartile range, and median.

Weighted Averages by country.

Total numerator and denominator Dec 2014 = 100.

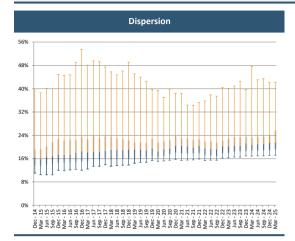

Weighted average. Banks are classified in the size class according to their average total assets between Dec. 2014 and Mar. 2025. Non-FINREP banks are assigned to the bucket of small banks

Period	Weighted average	25th	50th	75th
Dec - 14	13.5%	11.7%	13.6%	16.2%
Jun - 15	13.9%	12.0%	13.7%	16.8%

(1) Institutions that are subsidiaries of a large institution with the Head Office in another EU/EEA country. They contribute to country aggregates but not to EU/EEA averages. For example, at country level the subsidiary in country X of a largest hank domicided in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity of omicided in country Y is considered.
(2) Individual institutions that do not belong to a banking group and report only on individual basis. These institutions are not required to submit RINREP data on solo basis to the EBA and therefore they are not included in RINREP-based risk indicators in this Risk Dashboard.
(3) Institutions that are subsidiaries of an EU large institution. They contribute neither to country aggregates nor to EU/EEA averages because data for these institutions are included in the figures reported at consolidated basis by their parent companies.
(6) Number of branches of the largest institutions authorised in each country. The largest institutions have their Head Office in another EU/EEA country and they have the right to passport their activities. They do contribute neither to country aggregates nor to EU/EEA averages because data for these institutions are included in the figures reported at consolidated basis by their parent companies.

(1) Subsidiaries in the form of subgroup of another EU group which has the Head Office in another EU/EEA country.
(2) Individual institutions that do not belong to an EU/EEA banking group and report only on an individual basis. These institutions are not required to submit FINREP data on a solo basis to the EBA and therefore they are not included in FINREP-based risk indicators in this Risk Dashboard.

Individual country data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is considered. The sample of banks is unbalanced and reviewed annually. Being an unbalanced sample, the number of reporting banks per country can display minor variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead.

EU/EEA 372.2 375.2 145.3 146.3 146.3 147.3 63.7 62.3 61.8 206.8 209.2 209.4 111.3 111.9 113.6 59.3 60.3 58.3 Individual country 4 tai ancludes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is considered. The sample of banks is unbalanced and reviewed annually. Being an unbalanced sample, the number of reporting banks per country can display minor variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead.

(2) Gross carrying amounts, other than trading exposures.

(2) Gross carrying amounts, blans and advances at amortised cost (excluding at fair value through P&L, excluding trading exposures).

Individual country data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is considered. The sample of banks is unbalanced and reviewed annually. Being an unbalanced sample, the number of reporting banks per country can display minor variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of QI 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead.

(2) Gross carrying amounts, other than trading exposures.

The data is based on gross carrying amounts, other than held for trading.

Individual country Ada includes subsidiaries, which are excluded from EU aggregates. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is onicity of the consolidated entity domiciled in country Y is consolidated entity to consolidated entity to domiciled in country Y is consolidated entity to domiciled in country Y is onicity of the number of reporting banks per country can display minor variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead.

Exposures to Real Estate activities and Construction - by country of counterparty

In compliance with the Recommendation ESRB/2016/14 on closing real estate data gaps, the EBA is disclosing aggregated information on the exposures towards non-financial corporations under Real Estate activities (NACE code L) and Construction Sector (NACE code F) [11(I)]

(2) Data is country aggregated on the basis of the residence of the immediate counterparty. The information on the geographical distribution of exposures by country is reported by institutions where non-domestic original exposures in all 'non-domestic' countries in all exposures classes are equal or higher than 10 % of total domestic and non-domestic original exposures. For this purpose exposures shall be deemed to be domestic where the institution in the Member State where the institution is located.

Individual country data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries X and Y for the latter as part of the consolidated entity), in the EU aggregate, only the consolidated entity domiciled in country Y is considered. The sample of bank is unbalanced and reviewed annually. Being an unbalanced sample, the number of reporting banks per country can display minor variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in Umenher states are used instead.

(1) Applicable only to IRS reporting banks.
Individual country data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is considered. The sample of banks is unbalanced and reviewed annually. Being an unbalanced sample, the number of reporting banks per country can display minor variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead.

Individual country data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is considered. The sample of banks is unbalanced and reviewed annually. Being an unbalanced sample, the number of reporting banks per country can display minor variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead.

Individual country data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity of microlar includes subsidiaries of unknown and the example of banks is unbalanced and reviewed annually. Being an unbalanced sample, the number of reporting banks per country Can display minor variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead.

Individual country data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is considered. The sample of banks is unbalanced and reviewed annually. Being an unbalanced sample, the number of reporting banks per country can display minor variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead.

^{*} Icelandic, Liechtenstein and Norwegian banks have not implemented yet the reporting framework based on CRR3/CRD6. Therefore, their figures are included in the EBA Risk dashboard only until December 2024.
**Output floor applicable as of Q1 2025 under CRR3.

Individual country data includes subsidiaries, which are excluded from EU aggregate. For example, at country level the subsidiary in country X of a bank domiciled in country Y is included both in data for countries X and Y (for the latter as part of the consolidated entity). In the EU aggregate, only the consolidated entity domiciled in country Y is considered. The sample of banks is unbalanced and reviewed annually. Being an unbalanced sample, the number of reporting banks per country can display minor variations between quarters, which might accordingly affect quarterly changes in absolute and relative figures. As of Q1 2020 onwards UK banks are removed from the EU/EEA aggregate and subsidiaries of UK banks in EU member states are used instead. Other expenses claze chaze, extraordinary effects, impact from discontinued operations, impairment or (-) reversal of impairment on non-financial assets. These expenses are shown with a positive sign (like in the columns to the left). In case there are effects resulting in negative expenses (i.e. a positive income) they have a negative sign.

Methodological note

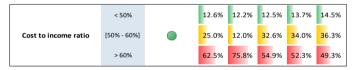

Risk Indicators' (RIs) heatmap

The heatmap provides a quick overview of the main RIs, in which it is possible to find the category, number and designation of the specific RI, its historic development and the three buckets in which each data point is assigned to across time (green for the "best" bucket, yellow for the intermediary one and red for the "worst" bucket). The "sample of reporting banks" returns the actual number of banks that submitted the expected data for that reference date (consolidated view).

For each of the RIs' quarterly data, the distribution across the three buckets is computed in respect of the sum of total assets for all banks that are included in the EBA's reporting sample in each reference date. From reference periods March 2020 onwards, the sum of total asses no longer includes UK banks.. Thus, if we observe any given bucket increasing its percentage, we immediately acknowledge that more assets are being assigned to that bucket. However, this does not necessarily mean that more banks are comprised within the bucket (the sum of total assets for all banks is fixed, as well as the total assets from each bank taken individually).

The traffic light of each RI can assume three colours (green, yellow and red) depending on the latest developments on the "worst" bucket of the RI comparing to the whole time series. If the "worst" bucket is progressing positively (i.e. in case fewer assets are being assigned to it), the traffic light should be moving away from red getting closer to green. The colour is computed considering the 33rd and the 67th percentile of the time series.

To help reading the heatmap, let us consider the example of the cost to income ratio:

The green traffic light for the ratio points to the good behaviour of this RI in the last quarter relating to past observations.

More than just declaring if the "worst" bucket has more or less percentage of assets assigned to it, this traffic light approach delivers simultaneously an insight to the latest developments in the RI's "worst" bucket and to the relative position of that data point comparing to all other observations in the same bucket.

The Risk Assessment (RA) meter summarizes the developments in all the KRIs included in the heatmap, providing a single measure. It is computed as the weighted average across the KRIs sum of total assets in the "intermediate" and "worst" bucket. The average is weighted in order to guarantee that each KRI category (solvency, credit risk and asset quality, earnings and balance sheet structure) receives the same weight. Since each category includes a different number of KRIs, the weight of each KRI is thus different. The risk perception increases with higher values of the RA meter: the closer to 100%, the higher the risk.

Net trading income (incl. FV result) on equity (numerator annualised, denominator as average) (2)	n/a	Ratio	Net Gains or (-) losses on financial assets and liabilities: held for trading, trading, non-trading financial assets mandatorily at fair value through profit or loss, designated at fair value through profit or loss (A) / Equity (B)	F 02.00	0280, 0285, 0287, 0290	0010	F 01.03	0300	0010
Other operating income on equity (numerator annualised, denominator as average) ⁽²⁾	n/a	Ratio	Total net operating income - net interest income - Fee & commission income - net trading income (A) / Equity (B)	F 02.00	0010, 0090, 0200, 0210, 0280, 0285, 0287, 0290, 0355	0010	F 01.03	0300	0010
Staff expenses on equity (numerator annualised, denominator as average) [2]	n/a	Ratio	Staff expenses (A) / Equity (B)	F 02.00	0370	0010	F 01.03	0300	0010
Other admin. (incl. depreciation) expenses on equity (numerator annualised, denominator as average) (2)	n/a	Ratio	Other admin. (incl. depreciation) expenses (A) / Equity (B)	F 02.00	0380, 0390	0010	F 01.03	0300	0010
Provisions on equity (numerator annualised, denominator as average) (2)	n/a	Ratio	Provisions (A) / Equity (B)	F 02.00	0430	0010	F 01.03	0300	0010
Impairments (credit risk losses) on equity (numerator annualised, denominator as average) (2)	n/a	Ratio	Impairments (credit risk losses) (A) / Equity (B)	F 02.00	0460	0010	F 01.03	0300	0010
Contributions to resolution funds and DGS (numerator annualised, denominator as average) (2)	n/a	Ratio	Cash contributions to resolution funds and deposit guarantee schemes (A) /Equity (B)	F 02.00	0385	0010	F 01.03	0300	0010
Other (Incl. tax) on equity (numerator annualised, denominator as average) [2]	n/a	Ratio	Profit or (-) loss for the year - Total operating income + Staff expenses + Other admin. Expenses + Cash contributions to resolution funds and deposit guarantee schemes + Provisions + Impairments (A) / Equity (B)	F 02.00	0670, 0355, 0370, 0380, 0385, 0390, 0430, 0460	0010	F 01.03	0300	0010

(1) The data points refer to the latest version of either TRNEEP tables ("F"), Or COREP tables ("C"), Option-late a curva every regulation-and-policy/supervisory-reporting/implementing technical-standard-on-supervisory-reporting/. For more information regarding the Risk indicators formulas, applicable to each reporting framework, please see the List and

(2) For the calculation of the average the previous December figure is used as an "anchor" for the subsequent year, and the second the number is taken from the latest quarter observation, i.e. Q1, Q2, Q3 or Q4.

(3) Applicable only to IFRS reporting barr

(4) The formula presented in this document for this risk indicator differs from the formula presented in the EBA list of risk indicators published on the EBA website, which will be subject to future revision.
