2. Total funding shall be all financial liabilities other than derivatives and short positions;
3. Funding of any type with open maturity including on sight deposits shall be considered as maturing overnight.
4. Original maturity shall represent the time between the date of origination and the date of maturity of funding. The date of the maturity of the funding shall be determined in accordance with paragraph 12 of Annex XXIII. This means that in case of optionality such as in the case of paragraph 12 of Annex XXIII, the original maturity of a funding item can be shorter than the time elapsed since its origination.
5. Residual maturity shall represent the time between the end of the reporting period and the date of maturity of funding. The date of the maturity of the funding shall be determined in accordance with paragraph 12 of Annex XXIII.
6. For the purposes of calculating the original or residual weighted average maturity, deposits maturing overnight or funding of any type with open maturity shall be considered to have a one day maturity.
7. For the purposes of calculating the original and residual maturity, where there is funding with a notice period or a cancellation or early withdrawal clause for the institution’s counterparty, a withdrawal at the first possible date shall be assumed.
8. For perpetual liabilities, except where subject to optionality as referred to in paragraph 12 of Annex XXIII, a fixed twenty years original and residual maturity shall be assumed.

6. For each counterparty, institutions shall report all of the columns 0010 to 0080.
7. Where funding is obtained in more than one product type, the type reported shall be the product in which the largest proportion of funding was obtained. Identification of the underlying holder of securities may be undertaken on a best efforts basis. Where an institution has information concerning the holder of securities by virtue of its role as the custodian bank, it shall consider that amount for reporting the concentration of counterparties. Where there is no information available on the holder of the securities, the corresponding amount does not have to be reported.

Funding sources with original maturity above 10 years shall not be reported.

2. For the purposes of determining the maturity of the funding obtained, institutions shall ignore the period between trade date and settlement date, e.g. a three-month liability settling in two weeks' time shall be reported in the 3 months maturity (columns 0070 and 0080).

For the purposes of C 69.00, funding that rolled-over and is still there at the end of the reporting period shall be considered to represent new funding.
12. By way of deviation from the rest of Section 1.4, the volume and interest rate of sight deposits shall only be reported where the depositor did not have a sight deposit in the preceding reporting period or where there is an increase in the deposit amount compared to the previous reference date, in which case the increment shall be treated as new funding. The interest rate shall be that of the end of the period.
13. Where there is nothing to report, cells relating to interest rates shall be left empty.
