Introduction

The EBA conducts semi-annual Risk Assessment Questionnaires (RAQs) among banks and market analysts. This booklet presents a summary of the responses to the RAQs carried out in autumn 2020, in which 60 banks and 15 market analysts submitted their answers. Results of the survey were received in September. The RAQ results are published together with the EBA’s quarterly Risk Dashboard (Q3 2020).

The results of the survey are presented in an aggregated form. The questionnaires, for both banks and analysts, can be found in the Appendices. The charts are numbered, with numbers corresponding to the questions in the distributed questionnaires. Answers to the same questions from former questionnaires may be presented where deemed relevant. For questions for which only one answer was permitted, any potential difference between the sum of shown responses and 100% is due to respondents answering either “n/a” or “no opinion”. In the summary of the main results most figures are rounded.

Should you wish to provide your feedback and/or comments on this booklet, please do not hesitate to do so by contacting rast@eba.europa.eu
Summary of the main results

The outbreak of COVID-19 resulted in heightened uncertainty, which presumably affects the submission of responses to this survey. Therefore, the responses and their historical comparison should be interpreted with great caution.

**Business model / strategy / profitability**

- **Banks expect profitability to further worsen in the following months.** Despite anyhow low profitability reported in the last quarters, less than 50% of the banks expect their profits to increase in the next 6-12 months. Analysts expect short term earnings to be affected by both increasing provisions, as well as pressure on net interest margins (between 50 and 60% for both). *(Question 3 for banks and Question 1 for market analysts)*

- **Banks target reductions in operating expenses as a way to increase profitability.** Around 50% of the banks indicated that a reduction in costs is a high priority area to increase profitability, while less than 40% focuses on fees and commission income. In line with previous surveys, automatisation and digitalisation are identified as the main areas to achieve a reduction in operating costs (close to 100%), followed by overhead and staff reduction (more than 80%). *(Questions 4 and 5 for banks)*

- **Around 50% of the banks estimate their cost of equity is between 8-10%.** Yet only 35% of the banks agree that their current earnings cover their cost of equity, significantly down from around 60% in the previous surveys. The majority of banks responded they are considering (or have considered) mergers and acquisitions (M&A; around 55%). Of these, banks primarily consider domestic rather than cross-border transaction (nearly 80%). On the key drivers for the current market sentiment analysts particularly point to the pandemic (more than 90%), while monetary policy trends in the EU are the second most important negative factor (around 60%). *(Question 1, 6, 7 for banks and Question 3 for market analysts)*

**Funding / liquidity**

- **Focusing on the next 12 months, banks intend to attain mainly more senior unsecured and senior non-preferred and senior holdco debt** (close to 50% of respondents for both categories). A rising share of banks also intend to issue subordinated debt including AT1/T2 (around 30%), while banks also reported an increased reliance on central bank funding, up to nearly 20% from 0% in autumn 2019. Similarly, analysts expect banks to increase their central bank funding and subordinate debt issuances (both around 50%). *(Question 10 for banks and Question 6 for market analysts)*
• Banks identify the main constraint to issue MREL eligible instruments is the pricing (more than 50%), which is at similar levels compared to previous questionnaires. (Question 11 for banks)

Asset volume trends and asset quality
• Following an already notable rise in the number of banks expecting a deterioration in asset quality in spring, their share even further increased. In particular, more than 75% of banks expect worsening in the asset quality of corporate portfolios (including SMEs and CREs), as well as to consumer credit. These shares are substantially higher than in the previous survey (around 50% in spring 2020). However, close to 60% of the banks still plan to further increase their exposures towards SMEs and residential mortgages. Furthermore, more than 60% of the banks indicate their cost of risk estimation for the current financial year will not exceed 100bps. In contrast, most of the analysts expect banks’ cost of risk to be in the range of 100-150bps. (Question 15 and 16 for banks, Question 9 for analysts)

Conduct, reputation and operational risk
• Close to 60% of the banks see an increase in operational risk. Yet, this is slightly decreased from the previous survey. Banks indicate that extension of remote working for staff (more than 90%) as well as the strengthening of related infrastructure (including the strengthening of cybersecurity levels) were the key reactions to the COVID-19 crisis (slightly more than 80%). Banks also suggest that enhanced teleworking arrangements will probably remain in place in the long-term (around 80%) and they expect increased spending on digital innovation and new technologies in order to attract new business channels (around 60% planning a significant or slight increase of respective spending). Banks seem to be less willing to increase their investments in non-bank FinTechs or startups (around 15% planning a significant or slight increase of respective spending). (Question 19, 20, 21 and 23 for banks)

General open question
• In the open question on risks looking ahead, banks and analysts highlight the challenges posed by the Covid-19 pandemic. Overall, respondents are mainly concerned about the increased uncertainty and the possible slowdown of economic activity. In addition, banks are particularly concerned on the impact of COVID-19 on asset quality and cost of risk. Other factors mentioned by banks were the low interest rate environment, political risks (e.g. Brexit developments and trade tensions) as well as increasing sovereign debt. (Question 31 for banks)
1. Business model / strategy / profitability

Business model/strategy/profitability
For the purposes of this survey, business model relates to the business mix underpinning the capacity of a bank to preserve and grow sustainable and predictable risk-adjusted earnings in markets and sectors in which it maintains a material presence. In view of this:

• Q1 Are you considering (or have you considered) M&A transactions?
  ○ Yes
  ○ No

• Q1.1 if Yes, are you potentially considering M&A transactions with/of:
  □ i) Domestic credit institutions, business units and/or portfolios
  □ ii) Other EU/EEA credit institutions, units and/or portfolios
  □ iii) Credit institutions, business units and/or portfolios from outside the EU/EEA
  □ iv) Fintech firms (domestic or foreign).

• Q1.2 if No, what are the main reasons for not considering M&A transactions? (please do not agree with more than 2 options):
  at most 2 choice(s)
  □ i) Complexity
  □ ii) Cost and riskiness of such transactions
  □ iii) Cultural aspects
  □ iv) Lack of transparency on asset quality of the potential partners
  □ v) Regulatory requirements and supervisory stance/actions/view
  □ vi) Lack of business cases/opportunities
  □ vii) No opinion / not applicable

• Q2 Your bank can operate on a longer-term basis with a return on equity (ROE):
  ○ a) < 6%
  ○ b) ≥ 6% and < 8%
  ○ c) ≥ 8% and < 10%
  ○ d) ≥ 10% and < 12%
  ○ e) ≥ 12% and < 14%
  ○ f) ≥ 14%

• Q3 You expect an overall increase in your bank’s profitability in the next 6-12 months:
  ○ Agree
  ○ Somewhat Agree
  ○ Somewhat Disagree
  ○ Disagree
  ○ No Opinion

Q4 Which areas are you primarily targeting to increase profitability of your bank in the next months? (ranking according to priority with 1-High Priority and 4-Low Priority):
  at least 6 answered row(s)
