Introduction

The EBA conducts semi-annual Risk Assessment Questionnaires (RAQs) among banks and market analysts. This booklet presents a summary of the responses to the RAQs carried out in Autumn 2022, in which 60 banks and 9 market analysts submitted their answers. Results of the survey were received in September 2022. The RAQ results are published together with the EBA’s quarterly Risk Dashboard (Q3 2022).

The results of the survey are presented in an aggregated form. The questionnaires are available in the Appendices. Charts numbers correspond to the question numbers in the questionnaires. Where relevant, answers from former questionnaires may be presented. For questions for which only one answer was permitted, any potential difference between the sum of shown responses and 100% is due to respondents answering either “n/a” or “no opinion”. In the summary of the main results, figures are rounded.

Summary of main findings

Higher interest rates, elevated inflation levels and bleak economic growth prospects have influenced banks and analysts’ responses to the EBA’s Autumn 2022 RAQ. Banks and analysts are rather optimistic about the overall impact on profitability although they also show some concerns about asset quality deterioration and funding costs. These concerns in part reflect the negative impact of higher inflation as well as the Russian war of aggression against Ukraine, including the associated official sanction packages.

Business model, strategy, and profitability

• **Banks and analysts have partially recovered the optimism about profitability prospects.** After a fall in the Spring 2022 questionnaire, the share of banks and analysts expecting an increase in profitability has risen to 70% and 80% respectively in this edition (50% and 25% respectively in the previous RAQ). In particular, banks are rather optimistic about the impact of rising rates, with 75% of them expecting an overall positive impact on profitability. *(Questions 1 and 3 for banks and Question 1 for market analysts)*

• **Loan repricing will be key for profitability improvement.** Net interest income (NII) has become the main area banks are targeting to improve their profitability. In previous surveys most of the banks selecting this option pointed to increasing lending volumes as the main strategy to increase NII (e.g., 85% in the Spring 2022 RAQ). In this questionnaire loan repricing is the option most commonly selected (55% vs 40% for increasing lending volumes). Commercial Real Estate (CRE), Corporate and SME lending are the portfolios where banks expect a larger proportion of loans repricing in the next 12 months. On the contrary, the repricing is expected to be rather slow for residential loans, where 60% of the banks report interest rate fixation periods at origination longer than 5 years. *(Questions 2, 7 and 8 for banks)*

Funding and liquidity

• **Banks intend to continue to focus on MREL-eligible instruments.** Similar to the previous RAQ, banks point at senior non-preferred/senior HoldCo as the main funding category they will focus over the next 12 months (more than 50%). A similar percentage of banks point to senior preferred – which is also MREL-eligible for many banks. Several banks also plan to focus on covered bonds (35%) presumably to refinance maturing TLTRO-3 borrowing. An increasing share of analysts expect banks to focus on retail deposits (45% in this questionnaire vs 20% in Spring 2022). *(Question 9 banks and Question 5 for market analysts)*
• **Funding costs are an increasing concern for banks and analysts.** Analysts are unanimous about increasing deposit costs. A rising share of banks also expect an increase in household and NFC deposit rates (55% and 70% in this questionnaire vs 20% and 35% in Spring 2022). In relation to the obstacles for the issuance of MREL-eligible debt, 60% of the banks point to pricing (40% and 50% in Autumn 2021 and Spring 2022 respectively). *(Questions 10 and 11 for banks and Question 6 for market analysts)*

**Asset volume trends and asset quality**

• **Residential mortgages, corporates, and small and medium enterprises (SMEs) continue to appear as the segments where more banks plan to increase lending.** Market analysts also point to sovereigns and institution (65%) as portfolios banks will show an interest in. *(Question 12 for banks and Question 8 for market analysts)*

• **Asset quality expectations have continuously deteriorated since the Spring 2022 questionnaire.** SMEs and consumer lending are the segments that banks and analysts most point out. Nonetheless, a slightly increasing share of banks expect a cost of risk (CoR) level below 25 bps (55% in this questionnaire vs 50% in the previous one). Analysts are more cautious and only 10% of them expect a CoR below 25 bps (20% in the previous questionnaire). *(Questions 13 and 14 for banks and Question 9 and 10 for market analysts)*

• **There is a high degree of heterogeneity on the planned treatment of the COVID-19 overlays in banks’ provisioning.** On the one hand, 45% of institutions have already released or are going to release them in the next 6-12 months. On the other hand, a similar percentage of the sample is following a more prudent approach with 15% of banks planning to retain their COVID-19 overlays to cover potential COVID-19 losses and 35% of banks planning to release them while recognising similar sized overlays to account for emerging risks. Most banks (85%) have already recognised provisioning overlays for reasons other than COVID-19. A very large share (70%) of banks point to the Russian invasion of Ukraine as a main reason for provision overlays post pandemic, while 40% point to higher inflation. *(Question 15 and 16 for banks)*

**Conduct, reputation, and operational risk**

• **Cyber risk and data security, and conduct and legal risk are the main perceived sources of operational risk.** In line with previous questionnaires, cyber risk and data security is pointed by 80% of both analysts and banks. However, conduct and legal risk has increased substantially compared to the previous questionnaire (from 10% to 55% in the case of analysts and from 45% to 60% in the case of banks). A high volume and frequency of cyber-attacks is reflected in RAQ observations. 45% of responding banks were subject to cyber-attacks in the first half of 2022, thereof 10% to 21 attacks or more. Around 10% of banks noted to have been victim of 1 to 5 successful cyber-attacks in the first half of 2022. *(Questions 18, 21 and 22 for banks and question 3 for market analysts)*

• **Risks related to customers’ transactions received from, or sent to, jurisdictions that are subject to international sanctions are the most relevant money laundering/terrorist financing (ML/TF) risks for banks (30% consider it a high significance risk).** Banks seem to consider their internal
policies, procedures, and controls for the implementation of sanctions mature enough as only 15% of them see risk of non-compliance with applicable restrictive measures regimes as a main operational risk. Risks associated with customers whose ownership and control structure are opaque or unduly complex, and with customers dealing in cryptos are also relevant for banks. Payment and settlement are the activities where more banks (65%) see an increasing ML/TF risk. (Questions 18, 19 and 20 for banks)

Fintech

- **95% of banks reported using, pilot testing or developing application programming interfaces (APIs) and artificial intelligence (AI) solutions.** The significant increase in the use of cloud computing (from 70% of banks to 85%) is likely driven by the digitalisation initiatives and the need to enable the adoption of new technological solutions, for example AI/ML-based solutions. Moreover, while less than 10% of banks are using or pilot testing quantum computing solutions, 25% of banks are already discussing the potential of this technology in the financial sector. (Question 24 for banks)

- **The use of AI is mostly reported in the area of fraud detection, creditworthiness assessment/credit scoring, and client or transaction profiling/clustering.** In addition, the AI methods and approaches used by banks appear to be increasingly diverse and complex. For example, while the most reported approaches are decision trees (85% of responding banks use it for at least one of the use cases) and regression analysis (80%), other approaches are also increasingly used by banks, in particular natural language processing (65%) and neural networks (60%) used, for example, in fraud detection. (Question 25 for banks)

ESG

- **Large corporates continue to be the main recipients of bank loans with green or social objectives.** Proceeds-based green loans and sustainability-linked loans are the most common form in banks’ lending to NFCs (90% and 60% of banks indicating as such, respectively). Similarly, loans that are a combination of proceeds- and performance-based are also pointed by 75% of banks. Green loans are the product offered most widely across all counterparty types whilst the market for social products remains smaller according to banks responses. Banks identify a lack of data and transparency as the most relevant impediment for the further development of the green retail loan market (75% rank this as either an extremely or significantly relevant impediment) followed by regulatory uncertainty and a lack of common definitions. (Questions 27 and 29 for banks)

- **The EU Taxonomy remains as the main standard for banks originating or planning to originate green loans.** The EU Taxonomy is the standard most widely used by banks to all types of counterparties. Banks complement the EU Taxonomy mostly with their internal definitions as well as other market standards across all types of loans. (Question 28 for banks)

- **Green bonds are the main sustainability-related funding instrument.** The share of banks stating to have issued green bonds remains significantly higher (75%) compared to other sustainability funding instruments. Looking ahead, analysts also remain positive about the issuance volume of
the green bonds with 65% of them expecting it to increase in the next 12 months. Most banks (65%) also indicate to have witnessed pricing benefits when issuing green bonds (up from just under 60% in the Spring 2022 questionnaire). While remaining significantly lower, such pricing benefit slightly increased also for social, sustainable, and sustainability-linked bonds compared to the previous RAQ. The share of banks indicating pricing benefit for these bonds remain between 10% and 20%. (Question 30 and 31 for banks and question 11 for market analysts)
1. Business model / strategy / profitability

Question 1: Autumn 2022 results

Q1. Do you expect an overall increase in your bank’s ROE over the next 6 to 12 months?

- a) Yes
- b) Probably yes
- c) Probably no
- d) No
- e) No opinion

Q4 What is your estimated Cost of Equity?

- a) < 6%
- b) ≥ 6% and < 8%
- c) ≥ 8% and < 10%
- d) ≥ 10% and < 12%
- e) ≥ 12%
Question 5: Autumn 2022 results

Q5 Which measures are you primarily taking to reduce operating expenses / costs?

- a) Overhead and staff costs reduction
- b) Outsourcing
- c) Off-shoring or near-shoring
- d) Reducing business activities (business lines and locations, incl. branches)
- e) Increasing automatization and digitalisation
- f) Other

Question 5: Comparison with earlier results

Q5 Which measures are you primarily taking to reduce operating expenses / costs?
Question 6: Autumn 2022 results

Q6 Are you considering M&A transactions?

- a) Yes
- b) No

Q6.1 If 'Yes', are you potentially considering M&A transactions with/of?

- a) Domestic business units and/or portfolios
- b) Domestic credit institutions
- c) Credit institutions, business units and/or portfolios in other EU/EEA
- d) Credit institutions, business units and/or portfolios from outside the EU/EEA
- e) Fintech firms (domestic or foreign)
- f) Non-bank financial service providers
Q6.2 If ‘No’, what are the main reasons for not considering M&A transactions?

- a) Complexity
- b) Cost and riskiness of such transactions
- c) Cultural aspects
- d) Lack of transparency on asset quality of the potential partners
- e) Regulatory requirements and supervisory stance/actions/view
- f) Lack of business case/opportunities
- g) Not envisaged

Q6.2 If ‘No’, what are the main reasons for not considering M&A transactions?

- a) Complexity
- b) Cost and riskiness of such transactions
- c) Cultural aspects
- d) Lack of transparency or asset quality of the potential partner(s)
- e) Regulatory requirements and supervisory stance/likelihood
- f) Lack of business case/opportunities
- g) Not envisaged
Question 7: Autumn 2022 results

Q7 What is the share of outstanding loans repricing in less than 12 months for the following portfolios?

- a) Commercial Real Estate (including all types of real estate developments)
- b) SME
- c) Residential Mortgage
- d) Consumer Credit
- e) Corporate (other than SME and Commercial Real Estate)

Question 8: Autumn 2022 results

Q8 What is the average interest rate fixation period for the following loan portfolios (at origination)? If the rate is fixed for the whole life of a loan, please, select the bucket corresponding to its maturity.

- a) Commercial Real Estate (including all types of real estate developments)
- b) SME
- c) Residential Mortgage
- d) Consumer Credit
- e) Corporate (other than SME and Commercial Real Estate)
2. Funding / liquidity

**Question 9: Autumn 2022 results**

Q9 In the next 12 months, which funding instruments do you intend to focus on?

- a) Preferred senior unsecured funding
- b) Senior non-preferred / Senior Holding Company funding
- c) Subordinated debt including ATL/T2
- d) Secured funding (covered bonds)
- e) Securitisations
- f) Deposits (from wholesale clients)
- g) Deposits (from retail clients)
- h) Central bank funding (medium and long-term)
- i) Short-term interbank funding
- j) CET1 Instruments
